Skylines Design

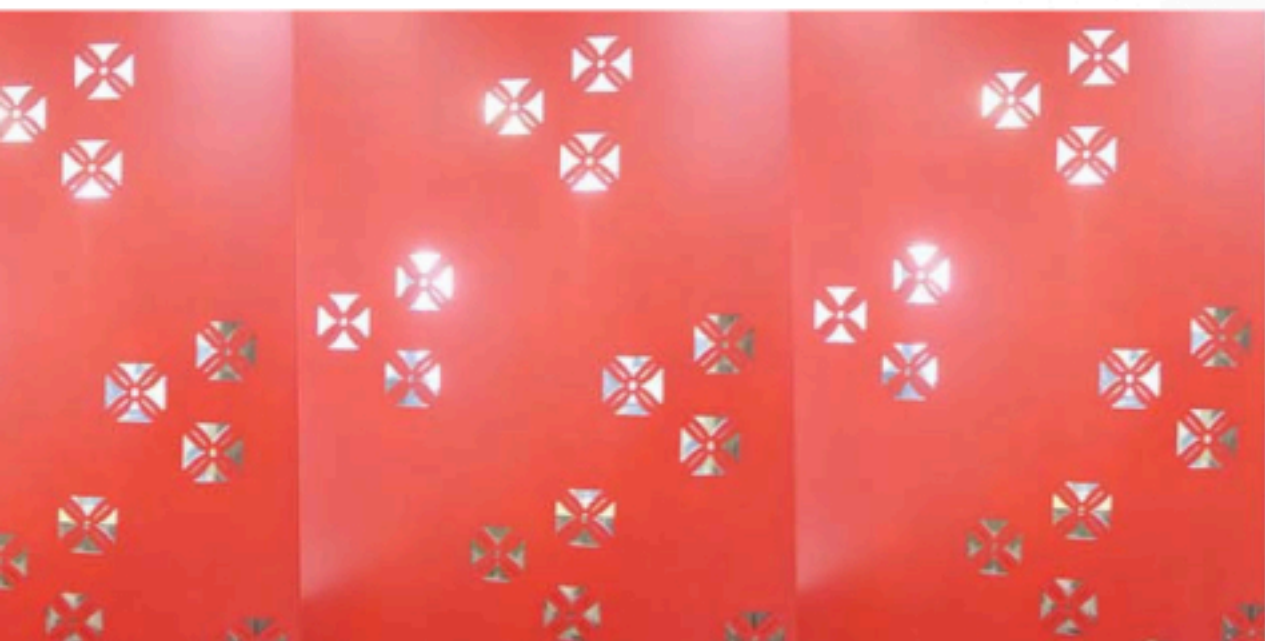

Michael Graves shares his design talents in an assortment of inspired architectural glass. The 5+ Collection plays on the balance of form and function and features modern abstractions of familiar materials, such as stone masonry, terrazzo floors, brickwork, and city streets. Transparent and diffused options are available in standard glass sizes and thicknesses up to 72 in. by 144 in., and all styles are made with Skyline's sustainable Eco-Etch process. www.skydesign.com

Sparkeology

Technology meets comfort in Sofia. The modular tech sofa features wooden shelf-top arms and an open-leg design and offers multiple options in a small footprint that is scaled-to-fit with the rest of the Sparkeology seating line. Side arms, privacy panels, and coat hooks are available, along with an integrated power option.

TMC Furniture, Inc.

The Decorative Ceiling and Wall Panels, like the pictured Daises Series style, feature a surface flourish of cut-outs and inlay wall panel applications. The wood offers warmth and sophistication to interiors in a variety of patterns and color options, as well as custom designs that allow for flexibility in interior design. www.tmc furniture.com
