DIMENSIONS

16W x 11D x 20H

SPECIFICATIONS

SIDE PANELS:

The side panels shall be constructed out of 12 gauge steel that is laser cut and contoured. The panels have a powder coat finish. The side panels shall be connected together by means of (3) ¼-20 stainless steel button head cap screws and (3) ¼-20 stainless steel acorn nuts.

RESIN SHELF:

Shelves to be a translucent solid resin sheet offered in a thickness of 1.0" (25Mm). The non-hazardous material has a soft profiled edge with a slightly textured finish on all sides and edges. The shelf is attached to the side panels by means of (6) satin nickel, decorative head lag screw.

Profiled Edge: the top's edges shall be profiled with a dual transitional radius to form a smooth feel.

Finish: all surfaces and two edges of the resin shelf receive a textured finish.

PROTECTION:

The seat has (4) decorative, color matching, snap rivets to protect the surface when being used as a bag holder. Open side edges are protected by a color matched u-channel the length of the unit when being used as a seat or a table.
